

Anderson Carlos dos Santos

Laboratory and Costs Supervisor

Respect to the standards and commitment to the understanding and attendance of the customer's needs. Pillars of a solid technical team aligned with the company's goals and values. I am happy to be part of this team at Cabelauto.

Anderson Carlos dos Santos has a technical background in electronics and a degree in administration. He started his professional activities in 1998 in the segment of OPGW and optical fiber cables when a multinational group of electrical conductors was implanted in Itajubá.

Since 2010 he has been part of Cabelauto's technical team, with great experience in the sectors of Development, Costs, Laboratory and Quality, comprising products destined to automotive market and low and medium voltage power.

Currently his role is as a Laboratory and Costs Supervisor, he is responsible for performance tests on the

company's products, evaluating performance, efficiency, quality, and safety. For him, to maintain the competitiveness in the market is one of the biggest challenges of the company, that must, for this purpose, search of increasingly competitive suppliers, reduction of waste and optimization of equipment and manpower.
