

Quality Control Supervisor

Anderson Carlos dos Santos

"Respect for standards and commitment to understanding and meeting customer needs. These are the pillars of a solid technical team, aligned with the company's objectives and values."

Anderson Carlos dos Santos holds a Technical degree in Electronics and a Bachelor's degree in Business Administration. His professional career began in 1998 in the optical fiber and OPGW cable segment, during the establishment of a multinational electrical conductor group in Itajubá.

Throughout his career, he has gained extensive experience in Development, Cost Analysis, Laboratory, and Quality sectors, working with products designed for the automotive industry and for low- and medium-voltage energy markets.

He currently serves as **Quality Control Supervisor**, responsible for ensuring that materials and products comply with applicable standards, as well as overseeing the adequacy of resources required to maintain this compliance.
