

### **Supervisor of Development and Costs**

*"Transforming technical challenges into viable solutions, combining innovation and cost reduction with responsibility."*

Danilo Augusto Carvalho holds a degree in Electrical Engineering. He began his professional career in 2000 in the fiber optic and OPGW cable segment. In 2001, he transitioned to the automotive cable sector and, in 2004, expanded his expertise to include the low-voltage energy segment.

Throughout his career at Cabelauto, he has gained extensive experience in the areas of Development, Costs, and Processes, covering products for both the automotive market and the low- and medium-voltage energy sectors.

Since 2018, he has been working in the Development and Costs area, and since 2024, he has held the position of Supervisor. In this role, he is responsible for the entire product development cycle, technical feasibility studies, cost reduction initiatives, development of new materials, and technical support to clients. His work is consistently aligned with applicable standards and best market practices, consolidating his reputation as a professional committed to innovation and efficiency.
